Copy of letter No.C.R.59/48-A3, dated 8.12.1948, from the Principal, Prohibition Staff College, Madras.

Sub: Stores - Hurricane Lanterns - For use of Trainees in Willingdon - Supply - Requested.

Regarding the electrification of tents in the compound of Willingdon, I wrote to say that I discussed the matter with the Electrical Engineer with reference to Board's C.R.23182/Abk 48-X.D.3, dated 8-11-1948.

2. Providing electric light inside the tents appears to be a very expensive job and has to be given up. Street lighting however can be arranged and the Electrical Engineer has taken up the matter and has promised to send his final opinion.

3. The question of providing lights for the trainees who occupy the tents has to be taken up.

4. One petromax light for each tent should be enough but the difficulty with petromax lights is that they require constant attention as the pressure has to be kept up at the p.t.

correct level and they have to be handled with great care, as the mantles are fragile. A common light for the 4 or 6 trainees who will be occuping each tent will not be looked after properly and it will be impossible to fix the responsibility for the care of the light on any particular trainee.

5. The only alternative therefore is to provide each trainee living in tents (they will be about 100) with a hurricane light. The consumption of oil will be six ox. per light per day, i.e. 300 ozs. per day, i.e., 3¾ gallons or 112½ gallons per month.

6. I therefore request a supply of 100 hurricane lights may be made and sanction accorded for using Kerosine oil at x 115 gallons month for lighting the camp.

GOVERNMENT OF MADRAS
